25X1

1. The official opening of the Berlin-Wuhlheide main freight sorting station took place in the beginning of February 1954. However, it has actually been in operation since November 1953.
2. The function of this station is to collect all freight traffic from east and west on the newly constructed outer ring railway. All the other freight sorting stations still in operation, such as Rummelsburg and others, are to be gradually eliminated.
